THE UNIVERSAL BROTHERHOOD OF MAN IS OUR MOST PRECIOUS POSSESSION, WHAT THERE IS OF IT.—Mark Twain

The BETHEL OXFORD COUNTY CITIZEN

Volume LII—Number 43

Established June 5, 1895

BETHEL, MAINE, THURSDAY, OCTOBER 24, 1946

\$2.00 a Year; Three Years, \$5.00

Single Copy—FIVE CENTS

MRS. AND MRS. PAUL CARTER

CARTER-CHAMBERLIN

Mr. and Mrs. Walter Huntington Bond of Franklin Square, N.Y. and Bethel, Maine have announced the marriage of Mrs. Bond's daughter, Miss Patricia Chamberlin to Mr. Paul A. Carter of this town.

The ceremony and reception took place at the bride's home in New York. Mrs. Carter was given away by her father, Willis H. Chamberlin of that city. Her gown was of a satin brocade bodice with an illusion skirt and train. She wore an heirloom veil of Brussels lace with a coronet head piece. The bride's sister, Miss Helen H. Lloyd of Newark, N.J. who served as maid of honor was gowned in a pale blue dress with a lace bodice and tulle skirt.

Mr. Carter's brother, Stanley Carter of Bethel served as best man.

Mrs. Carter attended Adelphi College and is a member of the New York Junior League. She is a direct descendant of William H. Seward, Sec. of State with President Lincoln.

Mr. Carter attended the public schools of Bethel and was in the service in the European theater for three years.

The house was beautifully decorated with flowers. The wedding party stood in front of potted ferns and palm trees. Refreshments were served following the ceremony.

The bridal couple will make their home in Bethel.

ELEANOR GORDON GUILD

The Eleanor Gordon Guild met at the Church October 22 for their meeting and a Halloween Party. Mrs. Walter Grover and Mrs. Maurice Brooks were co-hostesses.

The Sandwich Bar at the annual Church sale which is to be November 14th was discussed. Committees were appointed as follows:

Collecting: Mrs. Norman Doek, Mrs. Ernest Blake, Mrs. Avery Argentine.

Selling: Miss Abigail Gill, Mrs. Malcolm Mundi, Mrs. Gardner Gorman, Mrs. Josephine Parker, Mrs. Maurice Brooks.

Advertising: Mrs. Robert Kenton, Mrs. Erlend Paine.

Next meeting to be Nov. 6, with Mrs. Malcolm Mundi, Mrs. Rosemary Swain, co-hostess. Mrs. Robert Kenton to have devotions.

BIRTHDAY PARTIES

Teddy Hanscom was given a party on his ninth birthday by his mother, Mrs. Edward Hanscom last Wednesday afternoon. The group enjoyed games and horseback rides. Refreshments were served and the honor guest received gifts. Those present were: Patricia Kitteridge, Walter Kitteridge, Ray Blake, Buddy Conner, Jerry Smith, Judith Van Den Kerkhoven, Margaret Noyes and Teddy Hanscom.

Bethel Hall entertained a group of friends at her home Tuesday afternoon following school in celebration of her tenth birthday. Games were enjoyed. Refreshments, including a decorated birthday cake made by Mrs. Norman Hall were served. Those present were: Barbara Jodrey, Eleanor Summer, Jane Smith, Winona Korchonen, Louise Saunders, Mary Belle Bennett, Barbara Hulbert, Mary Jane Chapman, Beverly Noyes, Patricia Gunther, Susan Wight, Athalie Hall.

FRYEBURG ELEVEN

HERE SATURDAY

Credit will play the first of three successive home games with Fryeburg Academy here on Saturday. Both teams have posted victories over South Paris and it looks to be a real battle coming up. Coach Scott has his varsity men in fine shape, with the regular line-up ready to perform at game time. The kick-off will be at 2 P.M.

WSGS TO HOLD SERVICE

On Wednesday, October 30th, beginning at 6:30 P.M. the WSGS will hold a worship service at the Methodist Church in connection with the Week of Prayer and Self Denial. The object of this meeting is "to offer thanksgiving and praise to our Creator and Preserver, to quiet ourselves and know His Presence, to humble ourselves to the doing of His will."

A simple supper will be served and an offering taken to help some of our most needy missionary schools in our own and foreign countries. All women and girls of the church and parish are most cordially invited.

HOW MUCH HIGHER SHALL STATE UC FUND GROW

Nearly \$38,000,000 are now held on deposit in the United States Treasury in the Maine Unemployment Compensation Trust Fund. This money has been "contributed" by Maine employers and is intended for the payment of benefits to eligible unemployed workers.

Mrs. Carter attended Adelphi College and is a member of the New York Junior League. She is a direct descendant of William H. Seward, Sec. of State with President Lincoln.

Mr. Carter attended the public schools of Bethel and was in the service in the European theater for three years.

The house was beautifully decorated with flowers. The wedding party stood in front of potted ferns and palm trees. Refreshments were served following the ceremony.

White House Needs Business Basis

President of the U. S. Has Biggest Job in the World

By BAUKHAGE
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W.,
Washington, D.C.

WASHINGTON, D.C.—Once more events bring up the so far unanswered problem, how can the White House be put on a business basis?

The White House executive offices are the headquarters of the biggest organization in the world. The President of the United States is the head of this tremendous administrative set-up. Few people realize the extent of his functions, most of which aren't even suggested in the constitution, and few laws define them. They have grown like Topsy.

We are reminded of the scope of the presidential duties by Willard Kiplinger in his "Washington Is Like That." He points out that the President as leader of his party runs the party policies through the national committee. Some times the party line isn't working. You recall the stew over meat? A meeting of Democratic party leaders, at the moment when the President was preparing to announce at a news conference that he opposed removing the controls on meat prices, passed a resolution asking Chairman Hannegan to confer with administrative officials concerning the removal of such controls.

The President, as the top executive, heads the executive set-up and he appoints the men who run the executive machinery. He can't talk to each one every day. When there is friction a hot-box often develops. There are plenty of examples in history from Ike and Wallace, back to Lincoln and Seward, and before.

Chief Executive's Task Never Ends

The President issues "executive orders"—which someone has to write for him but which have the force of law—and the President must see that they are properly interpreted. Again there is trouble if these decrees tread on congressional prerogatives.

He has to get bills which he favors passed. Frequently he writes the first draft of such bills with the help of his legal advisors. He is expected, if necessary, to "put the heat on" to get them through congress. This means a lot of work in conference with congressional leaders on the phone and through his personal agents. A tactless agent can easily upset the applecart. Remember how Tommy Corcoran used to get under the skin of congress? Many others, well intentioned and otherwise, who came and went, might be named.

The President has to make up the budget, with the help of the budget director. If the director makes mistakes or asks for too much or too little, it is the White House that takes the rap. This involves billions.

He appoints the Justices of the Supreme court and federal judges. A bad choice may be fatal, and yet one person can't know the personal history of every likely candidate in this sense. The President forms the legal thinking of his era.

He is not only his own and his party's but also the nation's chief publicity man. A slip of the tongue not only can lose an election, but also could start a war. If war comes, he has to run it, for the strategy in the field is based on broad objectives decided at home. It was by no means merely military opinion which decided when and where the invasion of Europe took place.

There are only a few of the things a President has to think about. We have omitted mention of many minor but time-consuming matters such as whether the architectural beauty of the White House shall be altered with a new wing, or where some visiting potentate shall sit at the table. All full of dynamite.

It was the death of Woodrow Wilson which brought the presidential workload to public attention. He died, as much from overwork as from his disappointment over repudiation of the League of Nations. Serious study of the problem of furnishing a means to lighten the presidential burden began shortly thereafter, but it was not until 1929 that a specific plan was drawn up and submitted to congress. Among other suggestions for various departmental reorganizations, the plan created a presidential staff of "executive assistants."

About all the public knows about this corps of assistants is that they are supposed to possess a "passion for anonymity." The other thing about them, which isn't usually admitted, is that they have never functioned properly. That, at least, is the private opinion of one insider who has watched them come and go.

from the beginning. The reason is simple: People who expect a decision on an important matter won't take it from anyone but the President himself.

Must Keep Close Check on Aides

A pitiful example of the breakdown of the White House machinery was the recent Wallace ruckus. The President never need have been placed in the position he was. It is not a President's job to read over every document submitted to him. No head of a business as big as the government would dream of trying to do that. But somebody should have read both the Wallace memorandum on foreign policy and the Wallace speech and apprised the President of what they contained and implied. Whether it is the President's fault that he didn't have properly experienced hired help, is another matter. That his hired help didn't function, caused the damage.

An explanation, if not an excuse, has been offered in this case. The job of reading over public statements of administration members to see that they didn't conflict was handled by the OWI during the war. Before that the White House machinery had always taken care of such matters. That machinery had not been again set in motion when OWI ceased to function.

The fault was not that the President didn't prevent the Wallace-Byrnes clash, but that he was not prevented from preventing it.

I can think of only one similar bad mistake made by President Roosevelt which parallels the Wallace mix-up and it was due to a similar but not the same cause. It involved the highly technical question of the public debt. An "assistant," supposed to be an expert, furnished the figures on which the President based an important public statement. The eagle-eyed financial writers caught it. The "expert" was called to account; he furnished new figures, was wrong again and caught again. The President was forced to make a second public correction.

The duties of a President are simply too great for any one man. So Presidents have always had personal advisors, some times they were given an office, some times they had no official title—like Colonel House in the Wilson regime. Today we hear little about presidential "administrative assistants" but we hear a great deal about a group of "advisors" who have failed to function properly in spite of the fact that unlike the executive assistants they lack authority. These advisors are too "close" to the President. And they have been criticized by other members of the administration for standing between department heads, the congressional and party leaders. They are all old, close, personal friends of the President. They are inexperienced in government.

Whether President Truman's little circle of "cranes" has helped or hindered him is beside the question. No one can dispute the fact that they were chosen because of their loyalty rather than because of their experience. The question is whether presidential duties, as they exist today, can be delegated even to well-trained, highly capable staff. They can, is the answer, if such a staff is not blocked by higher authorities who, from motives of love, hate, politics, religion, temperament, taste or previous condition of servitude, use such authority, other than in the public good.

Telephone calls at the rate of four a minute asking answers to radio quiz questions were reported destroying the morale of a Brooklyn library. From now on the line is quiet.

The President has a new "Sacred Cow." The winged rummum in the Washington airport puts the other big transport planes in the cold-shoulder.

OPTIMISTIC OUTLOOK

Peak Income Predicted in 1947

WASHINGTON—Our national income will climb to a peak of 175 billion dollars in 1947 but will start tapering off toward the end of that year, according to a prediction of the Bureau of Agricultural Economics.

The predicted income would represent an increase of six per cent over this year's estimated 165 billion dollars, which is highest on record to date.

The bureau's 1947 estimates were contained in a report prepared for the agriculture department's outlook conference of farm officials. The bureau said a high level of domestic industrial activity and relatively full employment in most of 1947 will contribute substantially to higher consumer incomes.

VERSION OF NEW GERMANY . . . Baseball, favorite pastime of American youth, now is being played by the younger generation of Germans. American troops direct youngsters in a game of ball in the very shadow of Nuremberg jail, where top Nazi criminals were tried.

NEWS REVIEW

Parley Approves Italian Peace over Red Protest

PARIS:

Italian Pact

Following a pitched warning from Soviet Foreign Minister Molotov against the division of the world into eastern and western blocs, the Paris peace conference approved the proposed treaty for Italy.

Because it considered the treaty opposed to the interests of its Yugoslav ally, Russia led the bitter fight against adoption of the pact.

Championing Yugoslavia's cause, Molotov shouted that Russia would not permit the western powers to dictate to the "new Slavic democracies," and reiterated Lenin's axiom that "a people which takes its destiny into its own hands is invincible."

The Russian bloc's objections to the treaty centered against establishment of a strong, neutral government for the key port of Trieste, and creation of a new Italo-Yugoslav border.

A strong governor would deprive the mixed Italian-Yugoslav population of its self-rule, Molotov declared in calling for a powerful constituent assembly. An alliance of Italian Communists would have given the Reds control of the strategic city.

MEAT:

Predict Plenty

In pressing the administration to decontrol livestock, the beef industry advisory committee declared that there were sufficient cattle in the country to meet the requirements of the next 12 months but

they were being kept from market because of price inequities.

Citing department of agriculture statistics, the committee said there were 80 million head of cattle and calves on farms Jan. 1, of which 40 million were available for meat.

Despite heavy marketings this summer, 52 million head of cattle were available for meat by Sept. 24-30.

Estimating that supplies will be fully 15 per cent above requirements, the committee concluded that there would be 72.5 pounds of beef and veal per person from Oct. 1, 1946, to Oct. 1, 1947. This compares with 60.8 pounds per capita, in the 15 year prewar base period.

GREECE:

Inflation-Ridden

With goods and "hard" money scarce, inflation is riding high in Greece. A full meal without wine now costs more than \$4 and second-hand clothing sells at \$150 to \$200 and shoes at \$30.

As in all inflation-ridden countries, the dollar commands a premium in national exchange. While the official rate is 500 drachmas to the dollar, speculators offer as much as 6,500 drachmas for dollar. By selling dollars, then reconvert them into drachmas to U.S. currency again, Americans can make a pretty profit.

Indicative of the Greek government's desire for "hard" money, employees of the American embassy who are paid in gold flown from the U.S. receive 17,000 drachmas per dollar. This is three times the ordinary official rate.

Because there is no food rationing or price control over staple items, Greek white collar workers paid on fixed salaries are especially hit. To procure essentials, they must deal in the black market, make connections with government or business officials, or sell personal belongings to obtain sufficient money for purchases.

WAGES:

Production Bonus

In addressing the American Management Association in Boston, F. D. Newbury, vice president of Westinghouse Electric corporation, advanced a new formula for keeping postwar wages and prices within bounds.

Newbury's plan calls for maintaining basic wage and salary rates at their present level and payment to employees of additional income in proportion to increased volume of production, ability to pay and efficiency of the individual organization.

Stating that that proposal could not be called a profit-sharing plan, he said that the bonus payments would be considered as part of operating costs, with employees entitled to the maximum a company could afford to pay. Terming the plan highly flexible, Newbury said that an enterprise could easily readjust its wages if business declined.

WAR ORPHAN . . . Striking a pose of an American child movie actor, 2-year-old Valdemar Gauko is one of 21 German war orphans arriving in United States to be placed in foster homes.

OPTIMISTIC OUTLOOK

It said industrial production, as measured by the Federal Reserve board index, may average as much as 10 per cent higher than this year and close to 85 per cent above the 1935-39 average. This prediction was hedged with the proviso that production is not retarded by major labor-management disputes.

The bureau looks, however, for somewhat of a decline in industrial production in the latter part of the year, as a backlog of consumer demand for industrial products becomes more nearly satisfied. Such a downturn in production would be reflected in lower incomes of workers in affected industries.

Farm Income Dips.

While forecasting the rise in ag-

ricultural income, the bureau said the non-income of agriculture may be reduced as much as 10 to 15 per cent from 1946.

The farm income forecast is based on: (1) the premise that consumers will devote a larger part of their buying power to industrial goods which have been in short supply and less to food; (2) higher farm production costs.

Income of non-agricultural labor, on the other hand, is expected to increase 10 per cent next year, the bureau said, reflecting higher employment in the major part of the year and higher wages. The bureau said unemployment is expected to be somewhat heavier in 1947 than at present.

PRESENTATION OF COLD FACTS BEST CAMPAIGNING METHOD

IF IT SHOULD ever be my privilege to conduct the election publicity for either party, which it will not be, I would take a tip from the political wisdom and psychological understanding of Harrison E. Spanner of Iowa. I have seen them applied.

More than six months before the convention that nominated Gov. Alfred Landon of Kansas as the Republican candidate for President, Spanner, then vice-chairman of the Republican national committee, opened a western headquarters of the party in Chicago. In December, 1932, he began offering factual information regarding the operations of government to the rural press of the nation. It still holds the public in confidence. He aims to clarify your legal problems," says a sample advertisement. Sounds okay. What's wrong with letting the public in on what a lawyer is supposed to do, with maybe a little emphasis on what he is NOT supposed to do?

The public as a whole has been kept in darkness as to some of the sworn obligations of a barrister, and few know that he is supposed to be, first of all, an agent of the court in getting at the honest facts and securing strict justice.

The public as a whole has been kept in darkness as to some of the sworn obligations of a barrister, and few know that he is supposed to be, first of all, an agent of the court in getting at the honest facts and securing strict justice.

There are individual counsellors who, if allowed to advertise, would put their faces on surface cars and billboards and their telephone numbers in electric lights. It would be hard to tell whether they were selling legal services or a new shampoo.

We can imagine the country plastered with signs, "Let Smuggs Get You Out of It," "Fool the Judge With Lawyer Poole" and "Guilty or Not, Boggle Can Fix It Up," And even:

Keep out of jail
By hook or crook;
Consult by mail
Attorney Gook!

We think the California bar does well to limit the advertising to bar associations. But we warn it that, anticipating a further weakening of the old concept on legal ethics, a lot of radio boys are busily engaged in thinking up jingles to suit the individual barrister. Like these:

Does a lawsuit bother you?
Tinkle, tinkle, tootie-toot!
Phone for Lawyer Chidsey Pott;
Five opinions, that's a lot;
Amdavils, will and such,
Three flights up will save you much;
If it's legal aid you seek,
Special prices this week!

Boy, turn off that radio! We're going to pass up legal advice and take a bottle of hair oil instead.

The Village Blacksmith,
1946 Model

Under a spreading sassafras tree
The smithy smithy stands;
The smith, a helpless mite is he,
With trouble on his hands,
For he's short of everything he needs.

In all the types and brands,
He's short of iron, short of steel,
He's short of horseshoe flies;
The only horseshoes he can get
Are in neoprene-plastic styles,
And to get a keg of nails he must
Go seven hundred miles.

Week in, week out, from morn till night,
You can hear him telephone;
You can hear him pleading for some stuff.

In a voice that seems a groan,
As he hears of further bottlenecks,
While the shodless horses moan.

And children coming home from school
Look in at the open door;
They know, whatever he's doing,
He's short of iron, short of steel.

Is shooting bags no more!
He's even short of sufficient coal
To make the bellows roar.

This Home-Mixed Cough Relief Is Truly Surprising

So Easy, No Cooking. Big Saving. You may not know it, but in your own kitchen, you can easily prepare a really surprising relief for coughs due to colds. It's old-fashioned—your mother probably used it—but for real results, it's hard to beat.

First, make a syrup by stirring 2 cups granulated sugar and one cup of water a few moments until dissolved. No cooking needed. It's no trouble. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then got 2 1/4 ounces of Pineox from any druggist. This is a special compound of proven ingredients in concentrated form, well known for quieting irritation in throat and bronchial irritation.

Put the Pineox into a pint bottle, and fill up with your syrup. Thus you make a full pint of splendid cough syrup, and you get about four times as much for your money. It's easier to store. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then add 1/4 ounce of Pineox from any druggist. This is a special compound of proven ingredients in concentrated form, well known for quieting irritation in throat and bronchial irritation.

Put the Pineox into a pint bottle, and fill up with your syrup. Thus you make a full pint of splendid cough syrup, and you get about four times as much for your money. It's easier to store. Or you can use corn syrup or liquid honey, instead of sugar syrup.

Then add 1/4 ounce of Pineox from any druggist. This is a special compound of proven ingredients in concentrated form, well known for quieting irritation in throat and bronchial irritation.

Kathleen Norris Says:

Homemade Psychology

Bell Syndicate—WNU Features

"The world is full of women, once plain and superfluous, who have made themselves popular and useful and beloved."

By KATHLEEN NORRIS

If YOU feel that you can't afford the high prices that psychoanalysts are charging in these days of nervous disorders, there are less expensive ways of helping your young people—ways that have been in fashion for many hundreds of years and not only work a certain cure today but prevent any recurrence of the trouble tomorrow.

There is always a reason if your small girl of five begins to act queerly, to do inexplicable things. There is a reason for adolescent depression, insobriety, timidity, indecision, inhibitions. But when a child is loved, protected, well fed, carefully educated, these symptoms are bewildering to a good mother. She looks in perplexity at the baffling small girl, and finally washes her hands of the whole problem and takes the child to a child psychologist—and pays him \$10 a visit.

"My little boy is six," writes Mrs. Harris from Newport. "He has always been the sunniest, best-balanced youngster alive. But since the arrival of a small brother, Vance, has been completely unmanageable. He has gone back to baby tricks of wetting the bed, wanting his food from a bottle, crying a great deal, starting his sentences with 'me wants' or 'please feed me'.

"My daughter Beatrice is 17," says Martha Johnson of Seattle. "She has never been as attractive as her younger sister, nor especially popular with her elder brother. She has an unfortunate skin, rather heavy dark Spanish features and owing to much illness in childhood, is backward in school, nervous, fearful and entirely lacking in initiative or self-confidence.

"Let Me Alone."

"She takes the baughty position that nobody likes her and that she doesn't care, plams through the house, is never helpful or obliging, and alternates dark moods of gloom with bursts of silly, school-girl laughter. We have spent good money on doctors and psychologists, the latter can only remind her that she is young, healthy, loved by her family, and leave it at that and any such treatment invariably angers and humiliates her so much that she now refuses to eat anyone's saying irritably, 'Let me alone. There's nothing the matter with me.'

Personally, I have small patience with nice little bits of psychoanalytic stuff, although to perhaps one case out of ten I have known it to be of invaluable help. For healthy, favored and fortunate Americans to work themselves up to such a pitch of self pity and self-sacrifice in that they have to retain the whole catalog of injuries and slight and imaginary wrongs to compete stronger, and pay him for listening seems to me in a world so full of real suffering, to be a truly foolish and weak, but actually wrong.

Of course it is a delicious delight to go to the office of a fascinating physician, lie on a couch and talk about yourself for exactly 60 minutes, at a cost of \$5, earn a minute's rest, and feel that the last chapters of Saint Mark, where you tell your soul boy's problem, will tell to you 10 to have someone tell

More British Babies

The total of two births in the target areas in England and Wales from the beginning of the year to September 31 totaled 500,523. This is an increase of 23,322 over the same period in 1945, fashion alone accounted for 40,000 which was 10,103 more than last year.

The total birth rate, which in the quarter ending in June was the highest for 21 years, was 20.2 per 1,000. During the last week in the current return, birth rates for each were 20.1.

Red Feather Flown as Symbol In Social Service Fund Drives

Badge Is Beacon Of Hope To Sick, Weary, Homeless

For centuries the red feather has been accepted as a badge of courage and generosity. Robin Hood awarded red feathers to his followers for heroic and generous deeds; outstanding Indian Braves often were the recipients of red feather awards for acts of valor and acts of kindness.

This year, in cities throughout the United States, the Red Feather will mean hope for the sick, homeless and friendless. Community Chests of the country have adopted the Red Feather to designate services to orphans, the aged, the blind, crippled children and the sick.

In previous years the welfare fund raising organizations from coast to coast have been known by a variety of names and their symbols have been many and varied. In 1946, for the first time, practically all of them are known as Community Chests and all fly the Red Feather.

Many Join Movement.

Last year, 849 cities in the country raised close to a quarter billion dollars through community fund raising campaigns. These cities each conducted a single campaign to raise funds to support multiple welfare agencies.

It was in Cleveland, Ohio, that the Community Chest plan was born in 1913. A group of Cleveland business men, aware of the many fund drives held each year and of the vast sums spent annually to raise money for welfare purposes, evolved a plan to budget the city's welfare needs and to hold one campaign annually to obtain the money to meet these needs.

Before Cleveland held the first Community Chest campaign, 6,000 persons were contributing money for welfare purposes. During the 1945 Community Chest campaign, 65,000 residents of Greater Cleveland made pledges to support 100 agencies from agencies and 22 units of the national war fund.

Support 100 Agencies.

This year, the Cleveland Community Chest is campaigning in October for a goal of \$4,880,000. Proceeds will be used for the support of 100 Red Feather agencies, including youth and recreation groups, 19 organizations aiding dependent children, 17 hospitals, 14 family welfare services and other welfare organizations.

Throughout the nation, the story of the Red Feather is being told as Community Chests wage their annual fund-raising campaigns in October.

Chicago, which has the largest Community Chest fund in the nation, has goal of \$7,839,000 in the current drive. From Community Chest coffers will come 50 per cent

THEY NEED "HELPING HAND" . . . Typical of the millions of children throughout the United States who receive aid through Red Feather agencies supported by Community Chests are these youngsters from Cleveland. Top left, a poignant appeal for aid is mirrored in the face of Virginia at Goodrich house; top right, Jimmie, patient at Rose-Mary Home for Crippled Children, is overcoming the crippling effects of spastic paralysis; bottom: Lillian, resident at Cleveland Christian home orphanage, gives dolly the kind of care the home gives her; right: 5-year-old Jerry is going to walk some day, thanks to treatment he is receiving at Cleveland rehabilitation center.

of the operating costs of 192 Red Feather agencies. An additional \$906,000 is sought to continue USA activities for the final year.

One of the main objectives of Community Chests is to assure a good start in life for all children. Red Feather youth agencies universally strive to prepare the boys and girls of today for their responsibilities as citizens of tomorrow.

To carry out this objective, Philadelphia, for example, will allot the largest percentage of its campaign funds, more than 20 per cent, to its Red Feather youth recreation services and another 11 per cent to its child care agencies. Last year, the city's 39 Red Feather youth agencies served more than 189,714 boys and girls and provided 183,503 days

al capacity; their dispensaries annually give approximately 200,000 free or low cost treatments; all of the maternity homes for unwed mothers are chest supported; institutional care of 1,125 Cleveland orphans is given only by chest agencies, and 672 children are under foster home care through chest auspices.

A high degree of co-operation is essential to success of the Community Chest drive. That sort of co-operation is characteristic of Cleveland's annual fund raising event. Solicitation of chest pledges is carried out by a corps of 25,000 volunteer workers. City officials authorize decoration of downtown thoroughfares; the transit system and railroads permit campaign advertising; stores feature window displays stressing the work of chest agencies; radio stations, newspapers and theaters tell the story of the Red Feather organizations.

For the sick and troubled of Cleveland, as well as those of 849 other cities in the United States, the Red Feather this year means hope. For the greater number of persons who wear the Red Feather as Community Chest contributors, the brighter the outlook for those who need a "helping hand."

Returns Near Peak.

As the birthplace of the Community Chest idea, Cleveland has attained one of the best records in the nation for its annual fund drive. Total goal of the past 27 Community Chest campaigns was \$15,888,645, of which \$113,243,469, or 97.7 per cent, actually was raised.

In Cleveland Community Chest hospitals contain two-thirds of the city's public and private hospitals.

NO LONGER G.I.

Vet Students Replace Navy 'Boots'

FARRAGUT, IDAHO.—In an attempt to crack the national bottleneck in educational facilities, particularly for ex-G.I.s, education-hungry veterans have opened their own college here.

At the site of the sprawling naval training station here, the veterans opened a privately operated, non-profit, co-educational college and technical institute this month.

When the navy declared the huge training station surplus, veterans' organizations went into immediate action. They saw the station's vast dormitories, apartments, classrooms, laboratories, machine shops and recreational facilities as the answer to two major veterans' problems: Lack of educational facilities and housing accommodations attend school.

Raise \$250,000 Fund. Backed by local business men, encouraged by the United States department of education and other federal agencies, veterans' organizations in north Idaho and eastern Washington formed a private non-profit corporation. They called it Farragut College and Technical Institute, Inc., and set out to raise an initial operating fund of \$250,000.

Veterans' groups plunked down sums like \$10,000 and \$15,000 to start the ball rolling. Private clubs and individual citizens came across. The veterans hired a college president, Dr. Joseph H. Kuusner, formerly of Florida, who is a veteran. He rounded up a faculty.

CHICAGO.—Erosion's raids on soil fertility are costing the United States nearly four billion dollars annually, according to the Middle West Soil Improvement committee.

"The extent of this yearly damage is indicated by recent U. S. Soil Conservation service estimates that wind and water erosion removes 21 times as much plant food from the nation's farm soil each year as is taken out by crops off that land," the committee reports.

Dr. H. H. Bennett, chief of the conservation service, places the annual loss as a result of uncontrolled erosion and water runoff at \$3,644,000,000. He estimates that nearly one billion acres of the nation's farm lands need soil conservation treatment to protect them from erosion and to maintain their productivity.

It is clearly evident that eternal

vigilance is a "must" if our greatest farm asset—soil fertility—is to be preserved," Dr. Bennett insists.

"The recent wartime burden on farm land to produce record yields to speed victory has been succeeded by an equally heavy peacetime load to produce crops to meet the world-wide food crisis," the soil improvement group declares, adding that "the only remedy that will rescue overworked farm land from eventual fertility exhaustion is a program of effective soil rebuilding."

Painting out that any soil rehabilitation plan should be well-rounded, the committee says it should include the raising of legumes to improve soil tilth and to increase its resources of organic matter, regular crop rotation, steady use of mixed fertilizer containing nitrogen, phosphorus and potash, and pasture improvement.

Erosion Raids Take High Toll

Water Brings \$1 Barrel in Drought

AUSTIN, TEXAS.—Fall rains have alleviated a drought which turned up many eccentricities during late summer months.

At Aspermont in the high plains area drinking water sold for a dollar a barrel.

Also near Aspermont, the Salt Fork of the Brazos, the state's mightiest river, became a dry channel one day, then was running 25,000 cubic feet a second the following

Every Day Is July 4 At Ordnance Depot

TOOELE, UTAH.—Not once a year but every day it's Fourth of July at the Tooele ordnance depot, at least insofar as fireworks are concerned. Unsavory explosives—American, German and Japanese—which have accumulated at the depot must be destroyed. Depot officers do the task scientifically, placing about 50 tons of explosives in a crater to detonate them.

EDITOR'S NOTE: This newspaper, through special arrangement with the Washington Bureau of Western Newspaper Union at 1616 Eye Street, N. W., Washington, D. C., is able to bring readers this weekly column on problems of the veteran and serviceman and his family. Questions may be addressed to the above Bureau and they will be answered in a subsequent column. No replies can be made direct by mail, but only in the column which will appear in this newspaper regularly.

Vets Subsistence Allowance

Recent legislation placing a limitation on subsistence allowances for veterans enrolled under the G.I. Bill for education or training who are obtaining compensation on the side has brought a flood of inquiries about the new VA regulations concerning this phase.

Briefly, the new law provides that "in no event shall the rate of such allowance plus the compensation received exceed \$175 per month for the veteran without dependents or \$200 per month if he has a dependent or dependents." The limitation applies to veterans whether they are earning money outside while going to school or earning wages in apprentice or on-the-job training. In other words, if a veteran is going to school and earning \$150 per month on the outside, his subsistence would be cut from \$65 per month to \$25 per month to come within the \$175 per month limitation, if he is without dependents.

Veterans administration says that for perhaps three months, perhaps longer, veterans will get the same amount they have been getting in the past, but that enclosed with each check mailed up to October 31 will be a notice from the VA describing the changes in the G.I. Bill and warning each veteran that he later may have to return some of the money he is now receiving in subsistence allowance during this interim period. The same notice asks each veteran to give his training officer or regional office not later than November 5, a statement of his earnings during August, September and October. Veterans are warned that further checks will be delayed until this notice is received, so they should be sure to meet the November 5 deadline. After the veteran has turned in his notice, VA will start making adjustments in any subsistence allowance that requires changes. If there is a refund due the government, however, no time limit is set for returning this money.

Questions and Answers

Q. My husband served 14 months in the merchant marine, 12 months of this overseas. Is he eligible for the draft?—Mrs. R. M. B., Pensacola, Fla.

A. If you do not have any children and your husband is between 18 and 26 years old and unless he has served for a period of not less than 32 months beginning on or after May 1, 1940, on active duty not less than 75 per cent of the time and unless he applied for and received from the war shipping administration certificate certifying that he has completed a period of substantially continuous service in the merchant marine, he is subject to the selective service law and may be drafted.

Q. I am a widow with six children under 18 years of age and I am 50 years old and not able to do much work. I had a son killed in France in 1944. I was dependent on him. His wife has remarried. He had his insurance made to her, but he told me he wished he had made half of it to me although he never did. Can I get a part of it now?—Mrs. M. O., Cincinnati, Ohio.

A. No, you cannot obtain the insurance. If you are a dependent mother, however, you are entitled to a pension for the death of your son killed in action. Suggest you contact your Veterans' administration office in Cincinnati and give them the details. Your local Red Cross or any American Legion post will help you.

Q. My boy friend has re-enlisted in the army for a three-year period. He has married but separated from his wife and now he wants to get a divorce and marry me. Can he apply and receive this while still in service, now stationed in Germany? — S. P., Havre de Grace, Md.

A. Yes, his papers may be filed in either his own home county or that of his wife. He may designate some person with power of attorney to file his papers and act for him. In most towns the American Legion has a legal committee from which legal services is furnished free to soldiers. Suggest you contact the legal committee of your American Legion post.

Q. Could you give me some information about the 613th port company? When did it land in the states and where is it now? — V. S., Conder, N. C.

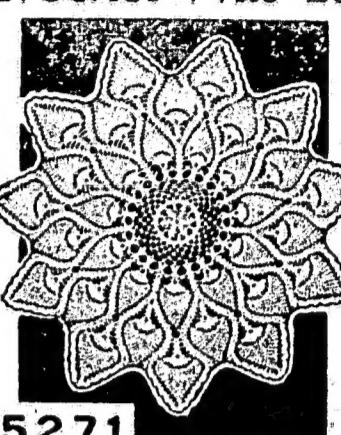

A. The Army says that the last address of the 613th port company was APO 435, San Francisco, and it was inactivated on the island of Luzon at Manila.

Q. Can a former serviceman apply for a G.I. loan guaranty while he is an terminal leavee—Veteran, Vinal, Okla.

A. I should think so if he is otherwise qualified or eligible.

LOCKE MILLS UNION CHURCH

Sunday School every Sunday morning at 10:30 A. M.

Sunday afternoon there will be Divine Worship at 2:30 P. M. Mr. Hawthorne of the Congregational Church in Bethel will deliver the sermon.

CHRISTIAN SCIENCE SOCIETY

Sunday Services at 10:45 A. M. All are cordially invited to attend. "Probation after Death" is the subject of the Lesson-Sermon that will be read in all Churches of Christ, Scientist, on Sunday, Oct. 27.

The Golden Text is: "Blessed is the man that endureth temptation for when he is tried, he shall receive the crown of life, which the Lord hath promised to them that have love him" (James 1:12).

The citations from the Bible include the following passages: "Therefore, my beloved, as you have always obeyed, not as in my presence only, but now much more in my absence, work out your own salvation with fear and trembling: For it is God which worketh in you both to will and to do his good pleasure" (Philippians 2:12-13).

The Lesson-Sermon also includes the following selections from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Work out your own salvation; it is a demand of Life and Love for this end God worketh with you. When the end of battle cometh away, you will discern the good you have done, and receive according to your deserving. Love is not easily delivered up from temptation. For Love means that we shall be tried and purified" (page 22 11-12).
